Stephens • MC Wilson

1. Vehicles (please be advised that the requirements stated below apply to all vehicles that are made use of as ambulances):	Ambulance Yes/No
capable of providing a 220-volt power supply to the patient treatment compartment of the vehicle	
1.8. The ambulance must have an adequate entry that allows for the loading and off-loading of the patient without compromising the condition of the patient	
1.9. The ambulance must be configured in such a way that a patient can be carried in the supine position with specialised medical equipment fitted	
1.10. The ambulance must have an approved restraining device fitted for all patients and emergency care personnel	
1.11. The ambulance must have a stretcher restrained with a restraining device, approved by the manufacturer of the stretcher, which shall be permanently fitted to the vehicle and shall restrain both the front and rear of the stretcher	
1.12. The ambulance must have a stretcher that is secured in such a way that it allows medical personnel clear view of, and access to, the patient and specialised medical equipment	
1.13. The ambulance must have a stretcher that is fitted in such a way that it does not block the entry or emergency exits of the vehicle	
1.14. The ambulance must have a stretcher that is fitted in such a way that it does not block access to the airway of the patient and in such a way that the performance of advanced airway techniques will not be hindered	
1.15. The ambulance must be configured in such a way that medical equipment and medical gas cylinders are secured in brackets that are attached to the body of the vehicle and do not allow any vertical or horizontal movement of the medical equipment or medical gas cylinders within the compartment of the ambulance	
1.16. The ambulance must be configured in such a way that medical equipment and medical gas cylinders are fitted in such a way that they do not obstruct the entry or emergency exits of the vehicle or pose a potential threat to personnel or patients	
1.17. The ambulance must have medical gas cylinders and outlets marked in accordance with SANS Codes of Practice and that have been subjected to visual and hydrostatic inspection by a Department of Labour approved testing facility	
1.18. The ambulance must have an adequate supply of convenient hanging devices that are fitted for intravenous therapy - such must be fitted in such a way as not to inflict injury to patients or medical personnel	
1.19. The ambulance must have a patient compartment that is lined with a non-porous material to avoid blood and other body fluids from contaminating the area, and allows for the cleaning of the compartment	
1.20. The ambulance must have surfaces and equipment within the ambulance free from the visible appearance of any and all contaminants including but not limited to: dust, dirt, blood, faeces, urine, vomit, human tissue or any other bodily fluid	
1.21. The ambulance must have a patient compartment separated from the driver compartment in such a way that the patient, treatment of the patient, and actions of the patient must in no way interfere with the driving of the vehicle	
1.22. The ambulance must in the case of a vehicle with a gross vehicle mass which exceeds 3 500kg, be fitted with retro-reflective red and retro-reflective yellow chevron strips on the rear of the vehicle, as required by the National Road Traffic Act	
1.23. The ambulance must in the case of a vehicle with a gross vehicle mass which exceeds 3 500kg, be fitted with yellow, retro-reflective strips to both the sides of the vehicle as well as the rear of the vehicle, in addition to the chevron, which must be fitted no more than 600mm from the lower part of the body of such vehicle, as required by the National Road Traffic Act	
1.24. The ambulance must be registered as an 'Ambulance' with the relevant authorities according to existing

- All staff members above are required to have valid PDP's.
- The patient attendants shall be advanced live support qualified and registered (i.e. CCA or Nat. Dip. AEC) with the HPCSA. It is recommended that the ILS patient attendants be assisted by a minimum Ambulance Emergency Assistant.
- There shall also be a consulting registered Medical Practitioner, available 24 hours per day, for medical advice or intervention by radio, telephone or on scene intervention. It is highly recommended that the registered Medical Practitioner hold currently valid ATLS / ACLS/ PALS or (APLS) certificates or equivalent.
- The ambulance crew must be dressed in an appropriate uniform.
- All staff members are required to have a signed contract signed by both the employee and employer.
- An SLA agreement is required to be signed by both the Medical Practitioner and owner of the Ambulance Service.
